

Out-of-Network Solutions

Driven by Technology and Experience

Don't Leave Your Clients Unprotected from Large, Out-of-Network Claims

Our Out-of-Network (OON) solution far outperforms traditional vendors. Using our RBP solution, we leverage clinical expertise and innovative technology to deliver fair reimbursements.

This is an excellent step for a plan that is not quite ready for a full network replacement. This allows your client to experience the savings from a network replacement without fully implementing RBP. Our RBP solutions on non-network claims have resulted in proven savings with nearly zero member disruption.

Included with Out-Of-Network Coverage
